SEUNGRYUL ANDREW LEE

DATA & AI PLATFORM ENGINEER

New York, NY | 862-682-1497 | srlee02099@gmail.com | Portfolio | GitHub | LinkedIn

Data & Platform Engineer with 5+ years building production systems across AI/ML infrastructure, subscription growth, and marketing technology. Own architecture, partner integrations, and reliability; develop reusable platforms and tooling that help engineers work independently.

PROFESSIONAL EXPERIENCE

Spotify | Senior Data Engineer, AI

May 2026 - Present

- **Production data & partner systems:** Own Premium acquisition integrations from requirements and data contracts through identity mapping, payload validation, deduplication, deployment, and production validation.
- **Self-service platforms:** Design an attribute platform separating AI-assisted interaction from deterministic planning, configuration, and validation, creating reusable guardrails for independent engineering workflows.
- **Backend reliability:** Improve request lifecycles, idempotency, retries, concurrency, and conflict reconciliation; assess migration safety and rollback paths, addressing systemic failure modes across shared systems.
- **AI/ML infrastructure:** Design and operate data foundations for training, evaluation, serving, and recommendations, alongside retrieval and workflow tooling; align teams on architecture, contracts, and validation standards.

QVC | Senior Data Engineer

Oct 2025 - May 2026

- Unified YouTube, TikTok, Meta, and Shopify attribution with cross-channel deduplication and late-arriving data validation, **reducing manual reconciliation by 70% across four teams.**
- Architected a GCP/Databricks lakehouse processing **hundreds of millions of behavioral events daily**; optimized Spark compute and storage, delivered FastAPI services, and implemented schema-drift and volume-anomaly monitoring.
- Developed marketing mix modeling using adstock, saturation, and regularized regression; built behavioral scoring and audience activation workflows with consent-based exclusions and validation gates.

Axtria | Enterprise Data Platforms

Mar 2023 - Feb 2025

Data Engineer II: Dec 2023 - Feb 2025 | **Data Engineer:** Mar 2023 - Jan 2024

- Designed analytical models and batch workflows across Databricks, Snowflake, and Redshift for DataMax, translating pharmaceutical client requirements into platform changes.
- Built automated changeset validation, schema migrations, and regression frameworks to protect data integrity and release compatibility; contributed to marketing mix modeling and budget allocation.

humanf | Machine Learning Engineer

Apr 2021 - Mar 2023

- Built LiDAR and multi-sensor ingestion, preprocessing, and reproducible training-data workflows for autonomous perception; designed schemas and indexes for **billions of spatial records.**
- Implemented dataset versioning, annotation checks, and validation using TensorFlow, NumPy, and Pandas; collaborated with ML researchers and Hyundai engineering teams on training datasets and evaluations.

TECHNICAL SKILLS

Languages & APIs: Python, SQL, Scala, FastAPI, REST APIs, partner integrations
Data & Cloud: GCP, Azure, AWS, Databricks, Spark/PySpark, Delta Lake, BigQuery, Snowflake, Redshift
Systems & AI: Data contracts, orchestration, idempotency, concurrency, observability, deployment safety, ML data infrastructure, retrieval, AI-assisted developer tooling

EDUCATION & CREDENTIALS

New Jersey Institute of Technology | B.S. Applied Mathematics; B.S. Computer Engineering

Certifications: Microsoft Fabric Analytics Engineer Associate (DP-600); Azure AI Engineer Associate (AI-102); Data Warehousing with Databricks; Advanced MLOps (Databricks)
